MEGAcoupon is a fast, easy way to grow and differentiate your business or organization. Whether you're a radio or television station looking to attract more advertisers and listeners, an association wanting to bring more members and revenue to your base, a business trying to secure more retail sales, a directory or listing company wanting to introduce a new revenue stream, or an entrepreneur seeking to launch a business with a turnkey solution, MEGAcoupon has what you need.

Simply put, MEGAcoupon is an online software package that enables you to offer online coupons with daily deals. MEGAcoupon provides you with everything you need to set up your site and work with your advertisers or companies.

Just like Groupon®, feature one advertiser every day for the daily deal that will create interest with discounts you set. Decide on the type of incentivized offer, for example two for one, 50% off, gift with purchase, etc. Determine the length of time and number of people that must be reached for the deal to happen. Email the offer and have it automatically post to Facebook and Twitter and get passed around to new potential customers.

Our Team sets up the software, you get the customer, and are on your way to generating more revenue for you and your customer.

In summary, our solution is a total low cost turnkey package that includes set up fees, training, maintenance and technical support.

We also include a simple dashboard and administrative system that allows you to quickly and easily enter and update deals, track company transactions and payment methods (e.g., wallet, credit card), and generate reports.

Scale the number of advertisers or sponsors with minimal time required – the only time required is to pitch and close the deal.

We also offer marketing and business support

Contact us today to learn more about how our team can help yours build your business.

Complete software and technology solution
– No need to worry about any technology

Marketing tools and technology
